Education

G H Raisoni College of Engineering and Management — Nagpur, India
Bachelor of Technology in Data Science – Expected June 2026 — June 2022 – Present

Saraswati Uchcha Madhyamik Vidyalaya Junior College — Nagpur, India
Higher Secondary Certificate (12th Grade) — June 2020 – April 2022

New English High School & Junior College — Nagpur, India
Secondary School Certificate (10th Grade) — May 2019 – May 2020

Technical Skills

Languages: Python, SQL, JavaScript, TypeScript, C, C++, PHP, HTML5, CSS3
Web Technologies: React.js, Node.js, Express.js, Next.js, Laravel, Three.js, FastAPI, Flask, RESTful APIs
Data Science & ML: Pandas, NumPy, Scikit-learn, XGBoost, LightGBM, HuggingFace Transformers, LoRA/PEFT, EDA, Feature Engineering, Explainable AI (SHAP)
GenAI & LLMs: LLM Fine-Tuning, RAG, Multi-Agent Systems, LangChain, Vector Databases, Prompt Engineering, Mistral-7B, OpenRouter API
Databases: MySQL, MongoDB, SQLite, SQLAlchemy
Visualization & BI: Matplotlib, Seaborn, Plotly, Recharts, Tableau, Excel
Tools & Platforms: Git, AWS, Streamlit, Jupyter Notebook, Google Colab
Core Competencies: Full Stack Development, Machine Learning, NLP, LLMs, Explainable AI, Big Data

Professional Experience

Backend Developer Intern — Dec 2025 – Jun 2026
Easy2IT Techno Solutions LLP — Pune, India
- Designed normalized SQL schemas and optimized queries for high-volume transactional data; built automated reporting and invoice pipelines with PDF generation.
- Managed multi-vendor database architecture ensuring data integrity and role-based access control across production systems.

Data Scientist Intern — Sep 2025 – Oct 2025
VOIS (Vodafone Intelligent Solutions) — Remote, India
- Built conversational data analysis pipelines using LLMs to automate extraction of business insights from unstructured telecom datasets.
- Performed end-to-end EDA and data cleaning on large datasets; surfaced actionable KPIs for stakeholder reporting.
- Trained and evaluated ML classification models with Python, Pandas, and Scikit-learn, improving prediction accuracy.

Frontend Developer Intern — Aug 2025 – Oct 2025
ApexPlanet Software Pvt Ltd — Remote, India
- Developed responsive web interfaces using HTML, CSS, and JavaScript; implemented mobile-first design best practices for client projects.

Data Scientist Intern — Jun 2025 – Jul 2025
Codec Technologies — Remote, India
- Contributed to data science projects involving data preprocessing, feature engineering, and model development.
- Utilized Python libraries (Pandas, NumPy, Scikit-learn) to build and evaluate predictive models.

Data Analyst Intern — Jun 2024 – Jul 2024
CodSoft — Remote, India
- Performed data collection, cleaning, and analysis using Python and Excel to surface actionable business insights.
- Created visual dashboards and conducted EDA to identify trends and support business decisions.

Projects

AlpaCare – Medical LLM Fine-Tuning — Python, HuggingFace, LoRA/PEFT, Mistral-7B, Gradio, Google Colab
- Fine-tuned Mistral-7B on 52K medical instruction pairs (lavita/AlpaCare-MedInstruct-52k) using LoRA/PEFT on free Colab T4 GPU with 8-bit quantization via bitsandbytes; deployed Gradio inference demo.
- Implemented keyword-based safety filters and safe-refusal fallback; built 30-prompt automated evaluation suite with human rating framework (safety & usefulness) rated by medically literate reviewers.

Smart Attendance Tracker – Face Recognition System — Python, Flask, OpenCV, face_recognition, SQLite
- Built a real-time webcam-based attendance system with face registration, live recognition, and auto logging; served via a Flask web dashboard with HTML/CSS/JS frontend.
- Designed modular codebase (register, recognition, database layers) with SQLite persistence; face encodings stored locally with no cloud dependency.

Project Samarth – Intelligent Q&A for Agricultural Data Python, Pandas, SQLAlchemy, Streamlit, SQLite

- Built an interactive data analytics platform enabling natural-language queries over Indian government rainfall and crop production datasets from data.gov.in.
- Designed an intent-planner pipeline with automated data normalization, fuzzy state/crop mapping, and Streamlit dashboard for visualization.

Financial Fraud Detection System Python, XGBoost, LightGBM, Scikit-learn, SHAP, Pandas

- Built an end-to-end fraud detection pipeline with advanced feature engineering on imbalanced financial transaction datasets using XGBoost and LightGBM ensemble methods.
- Applied SHAP-based Explainable AI to surface top fraud indicators for business stakeholders; achieved significant lift in precision-recall over baseline models.

Multi-Vendor Invoice Automation Platform Laravel, MySQL, PHP, PDF Generation

- Built Laravel-based multi-vendor system managing daily consumption entries with automated PDF invoice generation and normalized database with complex SQL aggregations.

Lumina AI – Smart Data Analyst Dashboard Next.js, TypeScript, Recharts, OpenRouter API

- Built an AI-powered dashboard for automated data cleaning, profiling, and visualization with interactive charts and natural language querying for data insights.

Doctor Appointment Booking System React, Node.js, MongoDB, JWT Authentication

- Developed a full-stack web platform for booking and managing doctor appointments with secure JWT-based authentication and role-based access for patients and doctors.
- Integrated MongoDB for patient, doctor, and appointment data management with real-time scheduling and appointment status tracking.

Certifications & Achievements

AWS Solutions Architecture Job Simulation – Amazon Web Services | Data Analytics & Visualization Job Simulation – Accenture North America

GenAI Powered Data Analytics Job Simulation – Tata Group | Advanced Software Engineering Job Simulation – Walmart USA

Data Analytics Job Simulation – Deloitte Australia
